

Adnan Khan

SENIOR FLUTTER DEVELOPER | 7+ YEARS EXPERIENCE

FLUTTER · DART
ANDROID · IOS · WEB

✉ hello@adnankhan.pro ☎ +974 3147 5575 🌐 www.adnankhan.pro 📍 Doha, Qatar

PROFILE

Mobile developer with 7+ years building cross-platform products with Flutter for Android, iOS and Web. Deep in Dart, MVVM and clean architecture, state management and REST integration — shipping scalable, high-performance apps for banking and government. Comfortable owning deployment, performance work and debugging inside Agile teams.

EXPERIENCE

Senior Mobile Application Developer

Ministry of Endowments and Islamic Affairs, Qatar · Dec 2023 – Present

- Lead development and maintenance of Flutter applications serving national public platforms.
- Design and implement user-centric features that raise accessibility and engagement.
- Partner with cross-functional teams to ship stable, high-performance releases.
- Diagnose and resolve production issues, measurably improving app stability.

Mobile Application Developer

Commercial Bank of Qatar, Qatar · Mar 2022 – Dec 2023

- Led the digital account opening platform, enabling fully remote customer onboarding.
- Built and maintained Flutter apps across Android, iOS and Web from one codebase.
- Applied MVVM with Provider for a scalable, maintainable codebase.
- Integrated secure REST APIs for financial services and core banking systems.
- Contributed to the retail mobile banking revamp, improving UX and performance.

Mobile Application Developer

Sunbonn, Pakistan · Jul 2019 – Mar 2022

- Built and deployed Flutter applications with a focus on scalability and performance.
- Converted UI/UX designs into responsive, pixel-accurate mobile interfaces.
- Integrated REST APIs and handled local data persistence.
- Worked closely with QA and design to deliver high-quality releases.

Trainee Android Developer

Danat Forward Productions, Pakistan · Jul 2018 – Sep 2018

- Native Android foundations: lifecycle, XML layouts and fragment management under mentorship.
- Took part in standups, sprint planning and code reviews across the full delivery cycle.

TECHNICAL SKILLS

LANGUAGES

Dart, Java

FRAMEWORKS & SDKS

Flutter, Flutter Web, Android SDK, iOS SDK

STATE MANAGEMENT

Provider, Riverpod, Bloc, GetX

ARCHITECTURE

MVVM, Clean Architecture, SOLID, DI (GetIt, Injectable)

BACKEND & DATA

REST APIs, WebSocket, JSON, Firebase, Hive, SharedPreferences, Secure Storage

SECURITY

JWT, biometric auth, encrypted storage, code obfuscation

PAYMENTS

HyperPay, Stripe, Apple Pay, Google Pay

DEPLOYMENT

Play Console, App Store Connect, TestFlight, provisioning profiles

TOOLING

Git, GitHub, GitLab, Bitbucket, JIRA, Figma, Postman, Android Studio, VS Code, Xcode

PRACTICE

Agile, Scrum, code reviews, pair programming

EDUCATION

BE Computer Engineering

Bahria University, Pakistan · 2014 – 2019

CERTIFICATION

Flutter Certified Application Developer

ATC Advance Training Consultants · Feb 2023

LANGUAGES

English — professional · Urdu — native

Meshka — Ministry Services App

FLUTTER · IOS, ANDROID

Official digital services platform of the Ministry of Endowments and Islamic Affairs, Qatar — public-facing services delivered to a national audience.

MY ROLE Lead developer — feature design and implementation, release stability, production issue resolution.

[Google Play](#) [App Store](#)

CBQ Mobile Banking

FLUTTER · IOS, ANDROID, WEB

Retail banking app delivered with a cross-functional team from a single Flutter codebase across three platforms, with secure API integration into core banking.

MY ROLE Contributed to the retail banking revamp — MVVM with Provider, secure REST integration, code reviews and performance optimisation.

[Google Play](#) [App Store](#)

CBQ Digital Account Opening

FLUTTER WEB

End-to-end remote account onboarding: guided application flow, document upload and Qatar ID verification.

MY ROLE Led development of the platform on Flutter Web, from onboarding flow to backend service integration.

[cbdao.cbq.qa](#)

TajPay

FLUTTER · IOS, ANDROID

Healthcare and payments app combining a wallet, bill payments and provider services with third-party payment gateways.

MY ROLE Flutter development and payment-gateway integration (HyperPay, Apple Pay, Google Pay), with local storage and API work.

[Google Play](#) [App Store](#)

Mijo — Productivity App

FLUTTER · IOS, ANDROID

Live productivity app for managing tasks, goals, lists and journalling — to-do management, journal and goal tracking in one place.

MY ROLE Built the architecture from scratch, state management with Provider, Firestore backend and Firebase push notifications.

[Google Play](#) [App Store](#)

RELEASE & DEPLOYMENT

Google Play Console, App Store Connect, TestFlight, provisioning profiles

SECURITY IN PRODUCTION

JWT, biometric authentication, encrypted storage, code obfuscation

WAYS OF WORKING

Agile and Scrum, code reviews, pair programming, cross-functional delivery
